

XXVIII. DRUG FREE HOUSING

THIS POLICY is adopted to meet federal and state requirements for any subsidies, grants, or loans received by the Cheyenne Housing Authority requiring drug free tenant housing. The unlawful manufacture, cultivation, distribution, delivery, possession or use of a controlled substance by any person receiving any housing assistance through the program of the Cheyenne Housing Authority is prohibited. Controlled substances are defined as any substance defined as such by Federal, State, or local drug laws. Tenants are responsible to see that prohibited activities do not occur on the premises and that members of the household and guests comply with this policy.

If CHA employees observe a violation of this policy or have reason to believe the policy is being violated, the employee is required to report the violation to the employee's supervisor. The appropriate CHA supervisor shall notify law enforcement officials of information regarding a possible violation of drug laws. Upon conviction of a violation of Federal, State or local laws regarding a controlled substance, the tenant shall be immediately evicted in accordance with the procedure established by law.

If a tenant's child is convicted of violating a drug statute, on the first conviction the tenant shall be given written notice that upon a second conviction, the entire tenant household shall be evicted.

I have received and read CHA's policy on drug free housing. I understand that the unlawful manufacture, cultivation, use, possession, or sale of a controlled substance on the premises by anyone will result in my immediate eviction. I understand that conviction of a violation of a drug law by any adult in the household will result in immediate eviction.
